

## LIST OF MEASURES TO PREVENT COVID-19

In order to sum up the prevention measures which will be deployed during the shooting to deal with the risks derived from COVID-19, based on health regulations, we have designed this list containing 10 rules:

1. Keep teleworking whenever possible.
2. Implement “combo online” which enables to display de shooting via streaming, which involves reducing the staff of the agency and the advertiser on set to a minimum.
3. OH&S specialist on set and correct training of technicians on prevention measures to deal with the risks derived from COVID-19 and correct use of PPE. A PPE kit will be handed out and visible signage will be placed pursuant to basic prevention regulations.
4. PPE: FFP2 masks or higher, gloves, bootees and personal hand sanitizer. Face shields, goggles and other necessary PPE are considered if required.
5. Control protocol and log of gradual and hygienic access to set, as well as relevant measures taken in case of onset of symptoms. In case of symptoms, contact 112.
6. Organization of the team: Safe distance (2 m) and physical barriers. The configuration of workstations, the organization of shifts and the remaining work conditions will be designed ad hoc based on the needs of the project.
7. CERTIFIED location hygiene: disinfection of the workplace with revisions of the elements of common use and filming equipment.
8. Personal hygiene: hand washing and hand sanitizer dispensers available to workers.
9. Hygienic catering: packs with individual portions.
10. In the making of we will record the implementation of all these measures.
